

# USING YOUR COMPUTERS FOR A PRISIM BUSINESS SIMULATION

Each team will require:

- Windows-based (7/8/10) laptop computer with:
  - Intel i5 2.4 GHz or faster and minimum of 4GB of RAM
  - **Excel 2010 32-bit** with Service Pack 2  
Note: Excel 64-bit will NOT work
  - 1 USB port available for read/write by PriSim
- Ability to print frequently
- 19"+ external monitor
- External keyboard & mouse (to pass around table)

We will assist your techs in testing the simulation on your computers.

**NOTE:** If after the test we determine there is an issue with your computers, you will need to rent computers (we can assist with this by utilizing our nationwide vendor).

Once your program is confirmed, we suggest that a test be conducted ASAP so that you can properly budget for rentals, if required.
